Razed in Isolation

Carbon 12, Unit 37, Alserkal Avenue, Al Quoz 1

22 March–10 May 2021

Curated by Marie-Charlotte Carrier, Razed in Isolation is an exhibition of Monika Grabuschnigg's latest ceramic works. Inspired by the 1815 volcanic eruption of Indonesia's Mount Tambora—the most powerful eruption recorded in human history—the exhibition speculates humanity's continuation after an event of such scale, offering different narrative possibilities through Grabuschnigg's descriptive ceramic surfaces.
