

# CARBON.12

## EDGAR ORLAINETA

In his practice, Orlaineta focuses on hybrid sculptural forms that draw inspiration from modernism, popular culture, and specific historic moments. Orlaineta primarily explores post-war design and architecture that generally depicted biomorphic shapes owing to strong surrealist influence. In his original works Orlaineta questions the symbolic and economic value of industrial design objects, which began as mass-produced products and later evolved into coveted collectors' items, by either incorporating craft elements or combing them into assemblages with everyday objects that lack any historical relevance. In his interventions and assemblages, Orlaineta seeks to open these design objects to new perspectives through denial of their functionality, historical or cult value in order to reactivate the legacy of the historical avant-garde.

Born in 1972, Mexico City, Mexico

Lives and works in Mexico City, Mexico
